

Symantec Brightmail AntiSpam™

Advanced antispam and email security solution for the enterprise

Deployed at the Internet gateway, Symantec Brightmail AntiSpam makes email more secure and productive, providing enterprises with an advanced antispam and email threat defense.

C

This award-winning solution leverages multiple effective technologies, globally distributed operations centers, a patented spam detection network, and a real-time filter delivery mechanism.

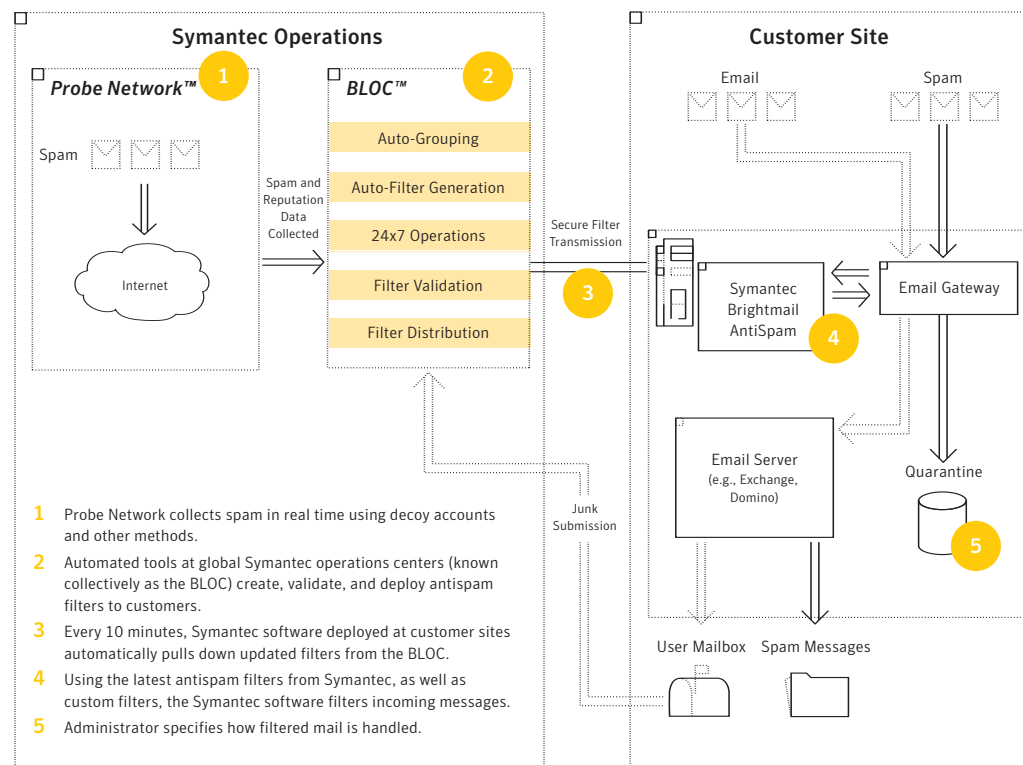

A

Incorrectly identifying legitimate messages as spam leads to missed business opportunities and end-user productivity loss. Offering the industry's highest accuracy rate,¹ Symantec Brightmail AntiSpam ensures that users don't miss important email. Safeguards include daily monitoring of accuracy by Symantec and automatic review of all potential false positives.

Many antispam solutions place even more burden on administrators, but Symantec Brightmail AntiSpam is constantly and automatically updated with the latest protection, requiring no tuning or training of filters by administrators.

KE . I

95% spam-catching rate²

99.9999% accuracy rate

Protects over 300 million users

Filters over 15% of worldwide email and over 100 billion emails per month³

Protects 9 of the top 12 U.S. ISPs⁴

Automatic, timely, secure updates every 5 to 10 minutes

Global operations centers in the United States, Ireland, Australia, and Taiwan

- Over 17 different filtering technologies, including proprietary signatures and heuristics
- Adjustable spam threshold to customize effectiveness and accuracy levels
- Language-based filters to block non-English language spam
- Antifraud filters to protect against phishing and email fraud

- Web-based control center provides centralized management of multiple servers, role-based administration, and system alerts
- Customized mail policies support flexible actions, such as message markup or quarantine, for different groups of users
- Multiple quarantines—Web-based quarantine for users or administrators, Exchange quarantine for Microsoft® Outlook® users, Domino™ quarantine for Lotus Notes® users
- LDAP support

- —Filtering statistics consolidated across all servers, providing visibility on spam filtering performance and trends
- —Optional antivirus protection scans and cleans messages infected with viruses and mass-mailing worms
- —Plug-ins and tools augment email clients such as Microsoft Outlook and Lotus Notes with spam-fighting features
- —Custom filters and block/allow lists enable administrators to tailor filtering to the needs of the organization
